PROJECTS AT A GLANCE

TABLE OF CONTENTS

WHO WE ARE

THE SECTORS

FACTS AND FIGURES

PROJECTS OVERVIEW

WHO WE ARE

LebRelief - LRC is non-political, non-religious, non-profit, and non-governmental organization (NGO) based in Lebanon.

With a steady rise of the number of people living below the poverty line, we aim to assist the most vulnerable communities to help steer the country towards a more prosperous future.

THE VISION

A world where vulnerable individuals are protected.

THE MISSION

We work to secure a world where vulnerable individuals are empowered, live safely, have access to sanitation, education, and work, to secure a dignified living. Working with utmost dedication, we aim to improve the living conditions of disadvantaged communities. Through collaborations with governmental institutions, stakeholders, local and international partners, we intend to build a sustainable consensus within the community.

THE SECTORS

THESECTORS

PROTECTION

We address the root causes of various protection and child protection issues in most vulnerable localities:

- Engage with children, caregivers, community members and key stakeholders (municipalities, religious leaders, shawish, employers, and SDC social workers) to contribute to a strong and sustainable protective environment.
- Engage with both host community and displaced population, by improving their knowledge, skills and capacities to prevent and respond to protection needs
- Further capacitate the community to safely identify and refer persons and children with protection concerns.
- Increase the level of protection via offering psychosocial and focused psychosocial support to the most vulnerable children.
- Offer positive parenting and parenting support to the affected caregivers, Provide
- awareness sessions to the community, and referrals from community-based activities
- Provide case management when needed
- Provide affected and traumatized right holders from certain circumstances and events (such as Beirut Blast) with PSS and FPSS activities,

Livelihood and social stabilization / YOUTH

We promote inclusion and increase opportunities for the most vulnerable right holders through increasing their employability, empowering them, and enabling the environment for effective adolescent and youth participation in decision making spheres. The main activities might include:

- Provision of certified and non-certified competency based short and medium term market-based vocational skills training programs
- Training on life skills and conflict resolution (non-violence, communication, leadership, etc)
- Recruitment of the trained participants in the infrastructure implementation of the ongoing projects and through on job trainings.
- Provision of cash for work opportunities
- Improving value chains through the development of each stage in it especially those related to the sectors where Syrian refugees are allowed to work

FOOD AND SECURITY / AGRICULTURE

We are dedicated to fostering sustainable economic growth, combating food insecurity, and boosting income generation for farmers in vulnerable communities. Our initiatives empower farmers and value chain suppliers and create job opportunities by improving agricultural infrastructure, building climate-resilient communities and food secure environment. The main activities include:

- **Enhancing Irrigation Systems**: Upgrading inefficient soil-based irrigation canals with low water retention to more effective systems, ensuring better water conservation and utilization.
- **Improving Agricultural Infrastructure**: Rehabilitating agricultural roads to facilitate access for farmers and enhance the overall efficiency of agricultural operations.
- **Introducing Modern Techniques**: Providing drip irrigation systems to maximize water efficiency and increase crop yields, especially in water-scarce areas.
- **Capacity Building**: Delivering comprehensive agricultural training programs to equip farmers with modern skills and techniques for improved productivity.

Strengthening Value Chains: Developing and enhancing agricultural value chains at every stage, with a focus on sectors where Syrian refugees are allowed to work, thus promoting economic inclusion.

THE SECTORS

WASH

We focus on sustainable water access, sanitation, and hygiene infrastructure to enhance community resilience, address the impacts of climate change, and support emergency and crisis response efforts. By prioritizing long-term stabilization and development, we aim to foster healthier and more sustainable living environments for vulnerable populations.
Our key activities include:

- **Strengthening Infrastructure for Stabilization**:
  -

Designing and implementing sustainable WASH infrastructure (Water Boreholes, Water tanks, water networks, Solar farms for pumping stations, wastewater networks, etc..) in marginalized and underserved areas, in alignment with government standards and strategies.

- **Promoting Hygiene and Public Health**:
  -
    - Conducting awareness campaigns to encourage proper hygiene behaviors and prevent waterborne diseases.
    - Supporting community-led initiatives to improve sanitation practices and maintain hygiene standards.
- **Localization and Capacity Building**:
  - Supporting the formation of WASH forums in collaboration with local civil society organizations (CSOs).
  - Empowering local actors to take leadership roles in addressing WASH challenges through capacity-building workshops, resource sharing, and technical guidance.
  - Promoting a localized and community-driven approach to ensure sustainability and long-term impact.
  - **Emergency and Crisis Support**

Support vulnerable communities during emergency situations through provision of essential WASH services including water provision through water trucking and public water points, distribution of NFIs such as hygiene kits, baby kits and dignity kits, provision of water

Shelter

Our shelter interventions aim to ensure that households in vulnerable communities live in safe, secure, and dignified conditions. By targeting shelters inhabited by households meeting specific eligibility criteria, we focus on reaching and maintaining minimum living standards while addressing the unique challenges posed by crises and long-term vulnerabilities.

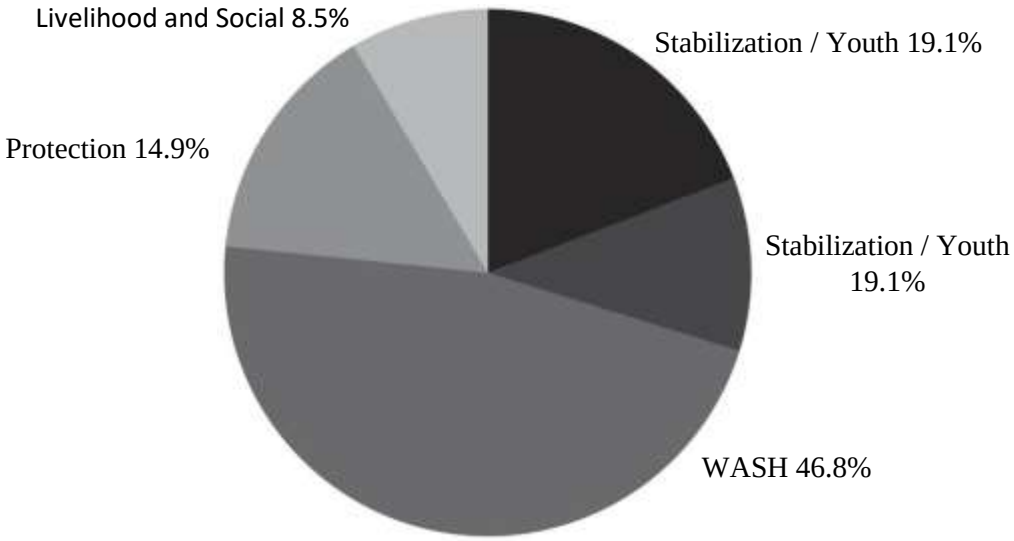

Key Objectives

- Enhance shelter safety, privacy, and security for vulnerable households.
- Restore shelters to meet minimum standards for living, protection from the elements, and hygiene.
- Support stabilization and long-term recovery through sustainable shelter solutions.

Interventions

- **Upgrading Shelters**:
  - Bringing shelters up to minimum living standards by installing doors, windows, partitions, and latrines to ensure privacy, security, and hygiene.
- **Enhancing Hygiene and WASH Facilities**:
  - Providing water storage, faucets, and showering facilities as part of shelter upgrades, aligning with public health standards.
- **Emergency support**:
- Conducting minor repairs for shelters hosting communities during crises, such as the Beirut Blast, COVID centers,Cholera Centers,IDPs hosting centers.

storage tanks, installing and rehabilitating latrines and managing WASH facilities in emergency collective centers.

Strengthening water systems in northern Lebanon and Akkar through the installation of solar energy and the rehabilitation of infrastructure

the purpose of which is to **Supporting Lebanese public authorities in reducing the impact of the multidimensional crisis within the water, sanitation, and hygiene sector** and which has the following essential elements:

Objectives: Support Lebanese public authorities in reducing the impact of the multidimensional crisis within the water, sanitation and hygiene sector.

Results:

1 (Solarisation): Improve the operational efficiency and sustainability of critical water facilities using renewable energy.

2 (Infrastructure): Restore and modernize water networks and critical water infrastructure, such as wells, to reduce water losses and ensure equitable access for beneficiaries.

3 (Social): Raise awareness among residents of catchment areas about the importance of water conservation.

4 (Provision of tools): Provide NLWE with tools, equipment, and materials for use in small-scale rehabilitation and maintenance projects.

Target population: households in the areas where the drinking water supply will be improved.

Geographical scope: North and Akkar regions in Lebanon

Budget: EUR 1,000,000

August 2026 – August 2028

AMF 2026

Project Title

Tailoring Skills for Women's Livelihood and Family Stability in Akkar

Project Overview

This project aims to empower vulnerable Lebanese and Syrian refugee women in Akkar by providing six months of certified vocational training in tailoring and clothing upcycling. The intervention seeks to improve women's employability, increase household income, strengthen **family resilience, and promote social cohesion between host and refugee communities.**

Target beneficial group: Highly vulnerable women from low-income households in Akkar, with priority given to female-headed households, widowed, divorced, or separated mothers, and women whose primary caregiving responsibilities limit their access to formal employment. The majority will be Lebanese host-community women, alongside a smaller number of Syrian refugee women with temporary or informal legal status. Most are mothers of children under 18.

- **August 2026 – Feb 2027**
- **Budget £10,000**

FAO 2025

"Support in the implementation of community-based awareness campaigns on wastewater management"

6/2025 till 8/2025

a. *The implementation of sensitization and awareness raising activities targeting local actors, municipality officials and local communities within Akkar district on the health risks of untreated wastewater, its impact on the environment and agriculture and, effective solutions to minimize the pollution of irrigation water in the El-Bared irrigation scheme.*

b. The Service Provider will produce, achieve or deliver the following outputs:

a. ***Output 1:*** *NLWE, municipalities and local authorities understand the risks and impacts of untreated wastewater discharge and are aware of available solutions*
b. ***Output 2:*** *Communities are sensitized on effective wastewater risks and management practices/solutions through tailored awareness campaigns*

Budget *USD 28,617.50*

Restoring Water Services and Increasing Awareness on Water Conservation in North Lebanon, Meniyye, Danniyye area

The project aims to address the water needs and sustainability challenges in the Meniyye and Denniyye areas. First, we plan to provide a sustainable and sufficient water supply to residents, ensuring that both immediate and long-term water needs are met. Second, we are committed to raising awareness about the importance of water conservation to empower residents to manage their water resources more responsibly and efficiently. These objectives will help improve the community's access to clean water while fostering sustainable practices that contribute to the resilience and well-being of the local population.

Specific Objective 1: Provision of sustainable and sufficient water supply to residents in Meniye, Denniyye area.
Specific Objective 2: Raising awarness on the importance of water conservation among residents.

Results

- 5,000 linear meters of Water infrastructure are improved as result of the intervention.
- One pumping station solarized to provide sustainable water service to the residents of the area.
- Boreholes rehabilitated to allow re-operating of water schemes.
- 900 right holders reached with water management and accountability awarness sessions.
- 900 water fixtures distributed to the participants during the water awarness campaign.

On the Job Training for vulnerable Lebanese & Syrian communities in Damour Area.

Employment-Intensive Infrastructure Project – ILO & EU Enable Program Under the Enable Program, funded by the European Union, LebRelief, in partnership with the International Labour Organization (ILO), implemented an Employment-Intensive Infrastructure project in Damour focused on the rehabilitation of irrigation channels.

The intervention adopted a dual learning approach, combining theoretical training with practical on-site experience. Participants received structured training in concrete works, formwork, masonry, welding, and surveying, followed by formal certification from DGTVET. They then applied their newly acquired skills in a real-work setting, working alongside a private sector contractor to gain hands-on experience.

This initiative aimed to enhance employment opportunities, equip youth with market-driven skills, and contribute to infrastructure development in the region.

AGRICULTURAL PRODUCTIVITY AND POVERTY REDUCTION IN LEBANON – PHASE 2

-The project aims at enhancing the agricultural infrastructure in Meniyye-Denniyye area by constructing irrigation canals ensuring sustainable water management for agriculture, rehabilitating roads securing safe access for farmers to lands and supporting farmers with drip irrigation systems and solar farms for water sources.

Results:

1- Creating 500 new cash for work opportunity through the labour-intensive improvement of irrigation canals and agricultural road construction.

2- Constructing 3000 linear meters of irrigation canals and rehabilitating 2000 meters of agricultural roads.

3- Improving sustainable income generation for 50 smallholder farmers

4- Installing two solar farms at water sources for cluster of farmers to secure permanent access to irrigation water

Enhancing Water services in Menye-Denniyye through network rehabilitation and community engagement

In response to the water supply challenges in Denniyye, our intervention aims to ensure a sustainable and sufficient water supply for residents in Syr El Denniyye, while also promoting youth engagement and supporting the water establishment. This project will focus on two primary objectives:

Specific Objective 1: Rehabilitation of water infrastructure in vulnerable areas contributing to public institutions optimization of performance , increasing cost recovery and securing better quality of water for people in need.

Specific Objective 2: Improvement of workforce employability for most vulnerable youth through engaging them in WASH training and cash for work for rehabilitation of water networks.

BASIC ASSISTANCE AND WINTERIZATION

This project aims to support the most vulnerable households (HHs) to meet increased costs of living during winter season while addressing the vulnerabilities of specific groups to avoid the risks of them resorting to negative coping mechanisms. This project will support the needs of 2,000 most vulnerable host and refugee HHs, covering 9,000 individuals, in Akkar governorate. This project targets female headed households (FHHs), HHs with people with disabilities, pregnant and lactating women, and children under 5 as they are disproportionally impacted during crisis and suffer the consequences of negative coping strategies. This project will provide Multi-Purpose Cash Assistance (MPCA) to cover winterization supplies and other basic needs while educate the community and work with local producers on alternative affordable heating materials. Beneficiaries will also be provided with awareness sessions on gender inclusive financial literacy and child protection to encourage equal and informed decision-making process within the HHs.

SUPPORTING FOOD SECURITY THROUGH MODERN IRRIGATION TECHNOLOGY IN MINIEH DONNNIEH

The project responds to the immediate needs of 210 most vulnerable farmers (Lebanese and Refugees) by providing long term and sustainable solutions (drip irrigation systems). The drip irrigation systems allows farmers to plant double the usual seasons, cultivate new type of plants in the same land (variety of products), decrease the quantity of fertilizers and water used, and water conservation. This will eventually improve availability and access to nutritious food and/or support socially, environmentally and economically sustainable agricultural production in Lebanon

ENHANCING A SAFE ENVIRONMENT FOR CHILDREN IN NORTH LEBANON

LebRelief will engage with both the host community and the displaced population, by strengthening their knowledge, skills and capacities to prevent and respond to child protection needs. In close coordination with service providers, outreach volunteers and gatekeepers, the community will be further capacitated to safely identify and refer persons and children with protection concerns. Effective dissemination will be done to ensure that critical information reaches all persons, displaced and Lebanese alike. LebRelief's activities will focus on both prevention and response through direct delivery of protection services in the targeted localities.

Lebrelief is targeting out of school and out of learning children aged between 10 and 14 years-old identified through community outreach, prioritizing children who have never attended school and are at risk of resorting to negative coping mechanisms. Lebrelief will provide Basic Literacy and Numeracy classes, transportation and recharge phone cards to address the specific barriers encountered by children.

Project Objectives: 1. Increase access to quality, and specialized learning and life skills training for out of school children and working children.

2. Increased access to quality, specialized child protection services and support to at risk of violence children including vulnerable and out of school working children.

THE SHABAKE PROJECT: STRENGTHENING RESILIENCE AND ECONOMIC RECOVERY FOR COMMUNITIES AFFECTED BY THE BEIRUT BLAST

This action aims to address the emergency shelter and protection needs of the most vulnerable Lebanese, Syrian, and migrant populations living in the affected areas of Beirut following the Port explosion. A consortium led by ACTED is proposing participatory and area-based shelter and protection assistance in alignment with the shelter sector allocation in close coordination with other actors on the ground. The action contributes to sectoral and geographical synergies in response to emergency needs aiming at enabling the most at-risk individuals in communities affected by the explosion to live in safe and dignified conditions along with supporting these individuals in accessing specialized protection services. Furthermore, the action puts the four protection principles at its center by promoting and operationalizing meaningful access, safety and dignity, local participation/empowerment, and accountability.

AREA-BASED RESPONSE TO THE EMERGENCY SHELTER AND PROTECTION NEEDS IN LEBANON FOLLOWING THE BEIRUT PORT EXPLOSION

This action aims to address the emergency shelter and protection needs of the most vulnerable Lebanese, Syrian, and migrant populations living in the affected areas of Beirut following the Port explosion. A consortium led by ACTED is proposing participatory and area-based shelter and protection assistance in alignment with the shelter sector allocation in close coordination with other actors on the ground. The action contributes to sectoral and geographical synergies in response to emergency needs aiming at enabling the most at-risk individuals in communities affected by the explosion to live in safe and dignified conditions along with supporting these individuals in accessing specialized protection services. Furthermore, the action puts the four protection principles at its center by promoting and operationalizing meaningful access, safety and dignity, local participation/empowerment, and accountability.

PROVISION OF ACUTE EMERGENCY RELIEF TO VULNERABLE CHILDREN AND FAMILIES IMPACTED BY THE BEIRUT PORT EXPLOSION

The objective of the project is to address the root of various protection issues, (particularly child protection), in Beirut's most vulnerable localities, LebRelief actively engages with children, and caregivers, to contribute to a strong and sustainable protective environment. Moreover, LebRelief engages with both the host community and the displaced population, by improving their knowledge, skills, and capacities to prevent and respond to protection needs. In close coordination with service providers within LebRelief to identify the most vulnerable beneficiaries in Beirut areas, the activities will focus on both prevention and response through direct delivery of protection services in the targeted localities.

STRENGTHENING LOCAL CAPACITIES TO DELIVER COMPREHENSIVE CHILD PROTECTION INTERVENTIONS IN THE NORTH OF LEBANON

Livelihoods in Lebanon have been severely affected by the demographic and economic shocks brought by the Syrian conflict, which has impacted key drivers of growth. New livelihoods opportunities are needed to prevent the escalation of economic grievances, which are a powerful driver of conflict and instability. The overall objective of the proposed project is to alleviate the socio-economic shock of the Syrian crisis on the most vulnerable groups, especially youth and women, by improving their access to income and employment through TVET and life skills trainings and decreasing tension between most vulnerable Syrian and poorest Lebanese in the North and Akkar Governorates.

North Lebanon and Aakkar Governorates

As part of LebRelief's social responsibility effort, came the partnership with Shelter Box Trust to distribute 750 tents to vulnerable Syrian refugee families. LebRelief volunteers were responsible for selecting beneficiaries according to Shelter Box's selection criteria, oversight of the distribution of Shelter Box aid, and the coordination of these activities with the relevant governmental and non-governmental actors in Lebanon.

WATER AND SANITATION INTERVENTIONS IN INFORMAL TENTED SETTLEMENTS

The lack of proper water and sanitation facilities in informal tented settlements hosting Syrian refugees was one of the main triggers to rising tensions between them and the Lebanese hosting communities. Therefore, LebRelief's intervention to install 78 toilets and connect them to the existing public underground sewage network and 20 water tanks of 2000 liters in volume led to a significant decrease in local tensions.

WATER AND SANITATION INTERVENTIONS IN INFORMAL TENTED SETTLEMENTS

2,910 RIGHTHOLDERS

244,000 USD BUDGET

APR 2013 - JUN 2014

LebRelief was able through its technical expertise to install 56 toilets equipped with an innovative environmental friendly settler and seepage pits complying with Environmental Protection Agency(EPA) standards in informal tented settlements that are not close to sewage networks thereby reducing heavy tensions in the area and 11 water tanks of 2000 liters volume. LebRelief also equipped dislodging trucks for the municipalities to service these settlements.
